Jaan Ali Consulting

ACCESSIBILITY & ASSISTIVE TECHNOLOGY — CAPABILITY STATEMENT

Accessibility, tested by someone who lives it. Jaan Ali Consulting is the practice of Jaan Ali — a blind/visually impaired professional and certified JAWS/NVDA screen-reader user with more than 12 years of experience at TD Bank and Apple Canada. Based in London, Ontario, Canada; serving clients across Canada, the United States, the United Kingdom, the UAE, Australia and worldwide, remotely and in person on request.

Services

- One-on-one assistive-technology coaching — screen-reader training (JAWS, NVDA, VoiceOver, TalkBack) on Windows, Mac, iPhone and Android, plus Meta smart glasses, braille displays and reading devices, for blind and low-vision individuals, employees and clients; employer- and insurer-funded arrangements welcome.
- AODA Check — a focused first look: one key user journey (up to 5 pages) tested manually with a real screen reader, with a written findings report prioritised by impact. Built for Ontario's December 31, 2026 compliance-report deadline.
- Full WCAG accessibility audits — websites and apps tested manually against WCAG, with a written report developers can act on and a walkthrough call. For government and public-sector buyers: formal Accessibility Conformance Reports (VPAT®-based ACRs) against Section 508 and EN 301 549.
- Screen-reader user testing — moderated sessions with a blind tester (JAWS, NVDA, VoiceOver, TalkBack) on your real customer tasks.
- Corporate accessibility & assistive-technology training — half-day and full-day workshops tailored to your team's real work.
- Accessibility consulting — compliance planning, remediation advice and accessible procurement guidance.

Who we serve

Blind and low-vision individuals and their families; government and public-sector organisations, financial services, healthcare, retail and e-commerce, education, technology and telecom teams, and employers accommodating blind and low-vision staff. Work is scoped to the standard that applies where you operate: the AODA and Accessible Canada Act (Canada), the ADA and Section 508 (US), the Equality Act (UK), the European Accessibility Act (EU), and the Disability Discrimination Act (Australia).

Why this practice

- Testing by a daily screen-reader user — certified in JAWS (Freedom Scientific) and NVDA (NV Access); iOS and macOS certified by Apple.
- TD Bank Accessibility Analyst (2023–2026) and EasyLine experience; Apple Canada Specialist with a Five-Year Milestone Award personally signed by former CEO Tim Cook.
- Every engagement begins with a free discovery call and a written proposal — full scope and full cost — before any work begins.
